

Ransomware attacks are on the rise How Sophos & EAC can help

What is Ransomware?

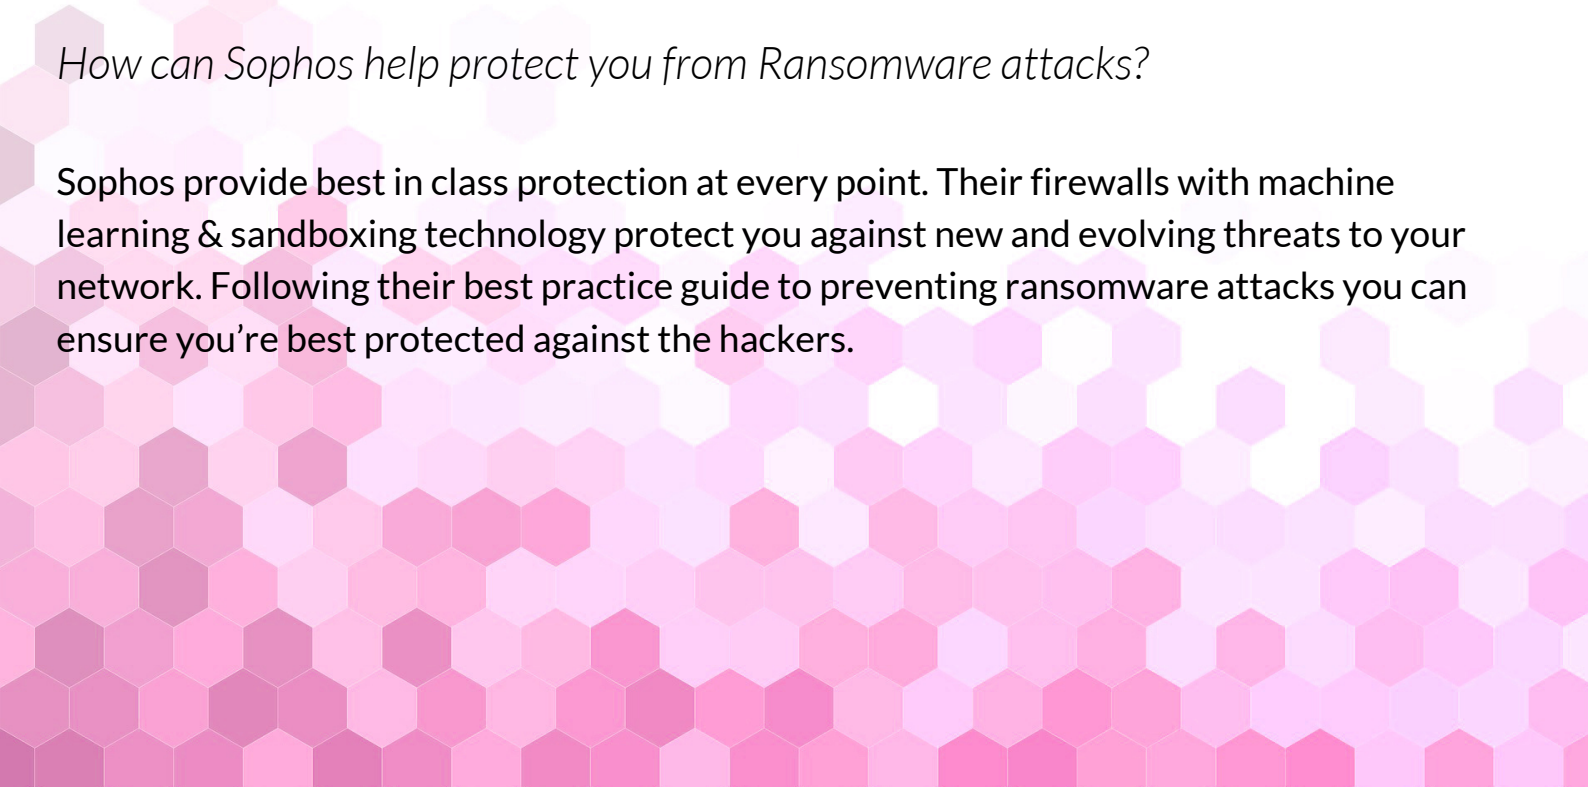

Ransomware is a type of malware that prevents you from accessing your systems or the data held on them. Typically the data will be encrypted and the only way to retrieve the data is by paying the hackers ransom fee.

Who are Sophos?

Sophos are a cyber security company that currently protect over 400,000 organisations worldwide from today's most advanced cyber-security threats. Powered by SophosLabs, their cloud-native and AI-enhanced solutions are able to adapt and evolve to secure endpoints and networks against never-before-seen cybercriminal tactics and techniques

How can Sophos help protect you from Ransomware attacks?

Sophos provide best in class protection at every point. Their firewalls with machine learning & sandboxing technology protect you against new and evolving threats to your network. Following their best practice guide to preventing ransomware attacks you can ensure you're best protected against the hackers.

Why Sophos?

- Sophos Firewall offers a full suite of protection features including sandbox with deep learning, IPS, ATP, dual AV, WAF, web and app control – all managed from a single, intuitive console.
- Synchronised Security – Sophos security heartbeat enables Sophos next-gen firewall and Sophos next-gen endpoint to share information to deliver synchronised security and app control. This allows Sophos to shield your network and endpoints against advanced threats.
- Sophos Central provides unified management of firewall, endpoint, server, mobile, email and wireless security.
- Comprehensive On-box reporting – Sophos firewalls are shipped with built-in hard disk drives. This removes the need to spend additional money on a separate unit for reporting as all historical logs and reports are stored on the firewall.
- Complete next-gen protection - All the advanced networking, protection, user, and app controls you need to stay secure and compliant.

Where can I find out more?

You can visit the Sophos website <https://www.sophos.com/en-us/products/next-gen-firewall.aspx> to see more or you can speak to the EAC team.
